

**BIGFIX SOFTWARE  
DISTRIBUTION****KEY FEATURES AND FUNCTIONS***Reap Exactly What You Sow*

BigFix Software Distribution leverages the BigFix single agent/single control infrastructure to precision target software installs and updates across enterprises. Reinforce operational excellence while reducing opportunities for misconfiguration-related security vulnerabilities. Transparency characterizes the entire process, from identifying computers eligible for specific packages, to closed-loop verification of desired results.

**FAST, TARGETED, TRANSPARENT SOFTWARE DISTRIBUTION  
TAKE THE UNCERTAINTY OUT OF SOFTWARE INSTALLS AND UPGRADES****FEATURES**

- Leverage the BigFix Discovery 7 platform as a conduit for fast, efficient, assured software distribution and updates
- Precision targeting of payloads to eligible computers
- Efficient use of network bandwidth and other computing resources
- Closed loop verification of distribution, install and update status
- Wizards and dashboards for point-and-click distribution process policy setting
- Compatible and enriching with incumbent software distribution solutions

**Precision Guided Software Installations With Confirmed Results**

- Installs new software rapidly and thoroughly across any size enterprise
- Upgrades existing software quickly with precise targeting of software requiring updates and upgrades
- Automated removal of obsolete or undesired software
- Closed-loop verification of software installs and uninstalls
- Precision targeting of software installs and updates to the right computers
- Wizards and dashboards automate and streamline software targeting, distribution and reporting processes
- Leverage BigFix infrastructure to distribute software and logical instructions (“Install on X machines, but on Y machines”) with maximum network bandwidth efficiencies
- Can supplement and enhance incumbent software distribution and install tools

**BIGFIX SOFTWARE  
DISTRIBUTION****BENEFITS**

- Fast, precise, verified software distribution and update processes
- Low service disruption or impairment risks
- Brings automation to an often complex and time consuming process
- Increases first-pass success rates, reducing subsequent diagnostic and remediation work
- Non-obsolete enhancement to incumbent software distribution and install tools
- Consolidate software distribution with other BigFix-supported security and system management processes

**BigFix Discovery 7 Platform Extends Vision, Capability, and Value**

- The industry's first and only single agent/single console/single converged framework for enterprise-scale PC lifecycle configuration management and endpoint protection
- Real-time visibility and continuous control of all BigFix managed computers: fixed, mobile, laptop, desktop, server—Windows, Unix, Linux, and Mac OS
- On-demand policy-based services for instant-on, flexible solutions for IT asset management, power management, compliance, and security
- Scalable from 1,000 to 200,000+ endpoints with minimal dedicated hardware requirements—one \$5,000-10,000 server manages up to 200,000 endpoints
- Easy management, customization and extensibility through graphical dashboards, policy creation wizards and human-readable scripting
- Rapid installation—typically one day for basic functionality

**Platform Availability**

Available for desktop, server and mobile computers running Microsoft Windows Windows 2000 and later versions.

Included in the BigFix Desktop and Server Management Pack or as an a-la-carte addition to the BigFix Discovery 7 Platform.

**BigFix: Revolutionary Technology, Breakthrough Economics**

BigFix®, Inc. offers the only real-time converged PC and server lifecycle configuration and endpoint protection framework that enables organizations to see, change, and enforce IT policies in real-time at global scale. Designed for highly distributed and complex IT infrastructures, BigFix delivers real-time endpoint visibility and control through its single-agent/single console, multi-function, on-demand architecture. Its award-winning technology is proven in production in 65 percent of Wall Street financial institutions, the world's leading retailer, one of the world's largest private health care institutions, and numerous federal, state, local, civilian and defense, agencies and educational institutions.
